

Our Solutions

ORION CLOUD

Private cloud solution offering self-management and rapid provisioning capabilities tailored for your private, hybrid, or disaster recovery needs.

MDR² Security

Security solution offering Managed Detection & Response, combined with Remediation and Baseline Policy Hardening.

About Our Solutions:

- Orion Cloud - Powered by Cloud Director:** Stellar's Orion Cloud capitalizes on VMware's advanced technology platform, integrating key solutions like vSphere, Cloud Director, and NSX. Designed to support highly demanding applications, our cloud service surpasses business requirements by delivering exceptional performance, unparalleled reliability, and dedicated white-glove support. Orion Cloud features simplified billing for resource utilization and self-management capabilities. We provides a scalable, secure, and robust environment that enhances your business's technological sophistication, setting the stage for future success.
- MDR² Security Powered by Rapid 7:** Stellar introduces MDR², an innovative approach that integrates Managed Detection & Response (MDR) and Managed Vulnerability into a unified, effective framework. This distinctive methodology enhances security operations by merging real-time threat detection, using XDR & SIEM technologies, with automated responses through SOAR solutions. Additionally, our MDR² Security Service Bundle offers continuous monitoring managed by our 24/7 Security Operations Center (SOC), coupled with comprehensive services for vulnerability remediation and system hardening. This service is designed to elevate your security practices, enhance your security posture, and increase resilience, thereby ensuring outstanding protection and client satisfaction.

	Orion Cloud	MDR ² Security
Primary Vendors	vmware®	RAPID7
Underlying Technologies	VMware vSphere / ESX, NSX, vSAN, Cloud Director	Insight IDR (XDR, SIEM, SOAR), Insight IVM (Vulnerability management)
Key Differentiator	Self-Service Management	Remediation, Baseline policy hardening
Example Use Case	SMB to large enterprise looking for scalable, cost-effective access to computing resources without large upfront investments in physical hardware.	SMB to large enterprise looking to limit attack surfaces and reduce impact of incidents with expert resources.
Stellar Support	✓	✓
Billing Method	Resource utilization based	Per-device IP based
Custom Integrations	✓	✓
Self Management Portal	✓	✓
Enterprise Add Ons	Business Continuity (Backups / DR), Virtual Desktop	GRC Compliance
DevOps / API	✓	✓
Compliance	SOC 2 Type II, HIPAA, PCI, CMMC	Managed Policy Hardening (CIS / DISA STIG)
