

Orion

The Enterprise Native Cloud

Powered by VMware Cloud Director

Orion, a revolutionary public cloud solution built on VMware, offers advanced self-management and rapid provisioning capabilities tailored for your private, hybrid, or disaster recovery needs. Orion transforms cloud computing, providing seamless scalability to meet your organization's evolving demands.

Infrastructure as a Service designed to exceed your needs.

- Points of presence in US including Honolulu, Phoenix, Chicago, and Greenville
- Enhanced scalability and flexibility for increasing enterprise demands
- Features a 100Gbps Networking, All-Flash NVME Storage and white-glove support
- Self-Service Portal enables easy management and monitoring of services
- Software-defined storage and networking greatly simplifies management
- Meets Industry Compliances (SOC 2, HIPAA, PCI and CMMC) to boost security
- Built on VMware's cutting-edge Cloud Infrastructure (vSphere ESXi, Cloud Director, and NSX)

Stellar solutions to achieve your business goals.

- Custom deployment strategies to meet specific business integration and requirements
- Our white glove migration services include end to end support to ensure a smooth transition to our platforms
- Predictable, Simple Pricing Model that is designed to be straightforward and transparent, avoiding unexpected costs

The VMware Cloud Verified logo is your assurance that you're getting a partner validated to deliver cloud IaaS with VMware's best-in-class network, storage and compute solutions. As one of these select partners, we have the experience and expertise to help you quickly migrate to the cloud and confidently create a world of opportunity.
