CVA PROGRAM OVERVIEW

The course begins with an overview of fundamental aspects of Chinese Medicine, including *Yin-Yang* and Five Elements theory, which serve as a foundation for case diagnoses and treatment presented later in the class. A variety of acupuncture techniques are taught, including electro-acupuncture, aqua-acupuncture, moxibustion, etc. in addition to conventional "dry" needling. In acupoint labs, students learn acupuncture points on live dogs.

The course is presented in 2 online sessions and 3 hybrid sessions. Each hybrid session includes two segments: online & on-site. Online segments are comprised of lectures and case demos that students can stream at their own convenience. On-site segments give students the opportunity to learn acupuncture points on live animals in small acupoint lab groups of four to six students per instructor. The on-site segment of this course is located in Dubai, United Arab Emirates.
